

Longtom project works underway with gas plant commissioning by late September

Nexus Energy Limited ("Nexus") advises that an Authority For Expenditure ("AFE") in the sum of A\$2.1 million for mercury removal facilities has been executed with Santos Limited ("Santos") in relation to project works required to Santos' Patricia Baleen Facilities ("Plant").

These works are underway and relate to the mercury removal from the gas which is our immediate priority and we expect to be installed by late September. Nexus is therefore targeting gas production to resume at that time.

Further works in relation to mercury removal from the condensate and additional works in relation to the gas is still under consideration and may involve additional expenditure of up to A\$3.9 million. Further updates will be provided as they come to hand.
